

Wath the nowerdays people belive and wath was growing by me

The nowerdays people belive the Industrie-knowledge witch says the earth and the unikverse is a motation by time, this is always making the best of each situation.

Sorry when I said my hohl live, I cant belive that.

Because I notised that annimals and plants can do wath I think. Very dangerous annimals, when they are free, are not chatching you when they hear the trueth, and all sorts of situaions, that you see it is ruled by somebody. But they chatch a person witch is going against the Loard of heaven, the god of the bibel and the nature or the nature. But this is althou a reaction of the annimirl, therefor it can be the oter way.

These notices have I got my hohl live, that I believe the nature of the earth and the universe is a creation of the old jewish god (Elochim, Adonai, Zebaoth).

It gives no kompromise between live and death. Sorry when I must say the humans have choosen with there very smart live, without very havey dangerous annimals and smart plants (the German people are the heavyes in these case, there are allowed to doe there way (taths the industrie) everything what they want. They allowed to put to death the nature, several peoples ([may be that these are sinc 1960 more than 10.000.000) people, annimals and plants]. They fetch the allowenc in other contries and so on. It is relally terror from the industrie and the people who have the right from the industrie), there death.

Therefor monyearning goes verry simple in Germany. They live against the nature and the good people.
