

## Nature-base-knowledge - - -all is worth to be handled with care

**The holiness for me is my Lord of heaven (the old Jewish Lord, our creator your master and king. He is ruling the nature you and everyone who realize this.**

**He has the power to make with any atom what his decision is in the whole not known universe.**

**He rules in the best way for you.**

- With watching each thing of his rules-power, he sees what can help and watches if it helps.
- His doing-power you can not imagine when you are fetched back in earth live more than 10.000 times where you normally stand your head still each second a day – that was the first help, the second was after brain death in the evening fetched back early in the morning around 6:00 - you notice all of these big problems, (troubles), but you can not do anything about it, because others have the power over you. That was my life by the people which (witch) say and have the education of the same people but they are doing with you, the opposite from what they have normally to do.

**Therefore the believing in the old Jewish Lord help me, when I help the nature and him.**

You can find this Lord correctly shown in the bible from John Wycliffe from approximately 1382 after Christ. - I wish a blessed sabbath from our heavenly father

Therefore you learn to pray, when it is necessary each second a day

your things with the worst for you - it is the nature you live from

- it is your body in which you are living
- this are your weapons with which you are defending your
- space and your life when your decision is by the old Jewish
- god with helps you when you help the nature and this god
- it is your life, in the nature.

This are your holy things and you look carefully after them.

With your blessing and your anoint for your life on earth and your god mine is the old Jewish Lord of heaven. Although your worst things.

Things are living much longer, when you take care of them and maintain (maintain) them (watch + notice what is going on with them).

- big problems making the handles and most cameras, for you, everyone, although the police nows where you are, big problems for the nature of the earth and the universe although for peoples and animals.

THE nature needs a fixed telephone with voice mail.

All you need from the nature is necessary to be done in the easiest and cheapest way for you, because no one can do it another way with only manpower. But in the right way for us nature.

Telephone, water, energy, houses,...

For my example we can use real nature-products for us, our tools and other things, it is going, when you pay attention.

For, my skin, wood, metal, leather and stones (I make stones for special presents, out of soapstones out of the nature) - - I mostly by 1 liter, it costs me normally 4,00 to 7,00 €, and the liter is mostly lasting for a year.

- I wash my hair mostly with soup, where I have added much water, the nature makes with Washing nuts (sorry I have a dictionary for students but there are much words not in, because my word use is much different to the normal people). I had to learn that the normal people of Germany can take away from your dirt, of the hair and add much. When You wash your hair too often, and with normal hair washing soup your hair is spoiled for months or nearly for a year. I take mostly a quarter of an hour when I wash my hairs. Why that? First my hairwashing soup is much smoother so that I have to wash my hair more times. But with attention, because my hair, needs it, or it is spoiled. Nearly with all things. I have to do it this way, or I have problems (troubles).

My washing machine with the nature looks funny for normal people. I bring there much more dirt out as a normal washing machine. The washing machine is split into three cooking bins one with 50 liters for really big things to wash. One cooking bin for 30 liters and one with 20 liters the cooking bins are best for cooking.

How is the use of the washing of the nature first you have to wash each day your whole body with poor water inside is with the dirt of your body you let it stand for days, stand by side with adding each day your worned clothes and the water with the dirt of your body it is necessary to eat only plants with easy milk products and honey, but it is necessary that your body is changed when I began to use this System of the nature I lived nearly 10 years nearly complete without meat and fish. When you will know where I got this knowledge, it was my curiosity, the thing to make all with the nature and my trying with the nature products.
