

Nature-base-law - - ground rights for the states witch using in there Nation the law of the unchanged nature. - -

For all of us have the old yewish Loard (Elochim, Adonai, Zebaoth) made big belifing results. He is the really the one who rules us contry.

This Loard shows you what the live is, in this contry , when it was with him, ore with the devel, who is really hard spoiling of all you, when you decide now wrong.

At this time you are allowed to make your free decition, but prey bevore to the old jewish lord, that you can see what is right ore wrong. The wrong decition is your death. Who was the god in the last 100 jears, was it with him better ore not. I am a free sklave of the old jewish Loard of heaven with is everyone shoven in the old bibel from Jon Wittcliff the bible is in original old English from aproximatly 1382, the nowerdays people have given that bible what is now in the internet a new name, because they changed this book. The original is verry heavy for the nowerdays people, they are rebuked in each Vers the best thing what I learned from this bible was: - in each Sitoation: „No wrong doing! Ore die!“ in font of us kreator as in front of the nature.

Especially for „Liechtenstein - the stone of lightness“ Wy where you judicial rebuced from the Loard of heaven nealy at 6/2019. Was it correckt? What your people of your state, the state police and your leader, your prince, did against me, not all situations, was bad. The Loard of heaven have your people , prince and your pounce judged. I can think about that the prince of following was by friends for more then a week, it was a jounge man. Thomething was going on, Because nowerdays is it an old man his first name is hans but not a man who is ruleing good for the Loard of heaven.

Clearly the pope say others. Was it good for your live? What is right ore wong?

Sorry, when I am saying the verry hard thrueth, that is one of the reasons that the kreator fecht me back to earthlive more than 10.000 times after braindeth. With I must feel moastly conscious experience of my own. In this sitoations I was very hard too hard medicintly treated, Though that I can not think abough what was happening with me. But while this sitoations happend so offen, daly over 21 years, I can remember what was going on, in these situations. - You can read it. -

- - - First, when I was lying in the bead, I felt, faling donwart with no end. - because my hard was standing still. - Than I had problems with the corectly movements of my Arms and legs very much bigger than normal, the reason I tryed to cancel the wholes, because I began, to get cold - The reason for that was the temperature of my boddy was falling. Afterwords when you cant move with your power of muscles everithing of your boddy - nonmally goes this very easy. Than a big stress is going through yor boddy and than when

the cold is too big. Comes the shooting: „help me, I get frozen“ - (I had got bought a very wrong new dictionary, which have the notice that, that word is written, but you find it not [de, gefrieren, gefroren]).

After that situation all is very far, although when the people who is coming stands near to you, although touching you. - This situation is after brain death, when the Lord of heaven is using you, for this situation).

Each Morning the next day, about 6:00, the Lord of heaven has fetched me back to earthlive. - -

The live in this time is live by people which are doing the opposite of their normal doing. Handworkers are repairing it broken, Doctors which are normal murders, judges which are just completely wrong, These do you not see it easily, it is borderd in the normal right, That people do what they want. That their money earning is very easy.

After this for me necessary exercises with us Lord of heaven, back to the things I want to write to.

Groundrights for a state with the old Jewish Lord,

The biggest help and arrangements comes from us heavenly father, who is the creator of the earth and the universe, with pleasure we notice this.

Therefore is this Lord of the heaven us really ruler.

His day of rest are fixed for us, because we are living from him.

The Sabbath each week, the day of the resting after the creation. (The day of remembrance that the nature of the earth and the universe are the creation of the old Jewish Lord of heaven).

It must be although one fixed day for all nations although it can give regional days for that thing. When is the day of remembrance of the English people, they have a very good sign for these days the poppy a regional flower and a really good helping animal for the nature (mine is the Kodiak grizzly (rex) the biggest version of the Kodiak grizzly. These animals have a high more than 2,40 meters, a weight from more than 800 kilo very heavy dangerous animals, when it gives you can although juice animals like mammoths or dinosaurs

Why that?

- These animals can repair with us creator the nature of the earth and universe
- With these animals can us creator collect water and minerals, because the industries have all easy going and some of the hard going oil put out of the earthground, we have to give the earth quickly oil back, or the earth must change their live-nature

that means air-details and temperature but the heaviest thing for us all, is the dirt from 300 years.

From the beginning up to the end, is in air, water and ground.

That is very heavy, the humans and a lot of plants and animals are dying quickly. -

Therefore I thought of what can help in these situation, what I know.

A very little part of oil is going in the ground when humans and animals rotting on the ground of the earth. - - - I know these is very ugly, but for me better than the soon death, where I can nothing do against it.

- In the nature where these animals are much living, Is it very hard to live, because the education of the nature for the nature, is very strict. Living against the nature the liveground for each creation (humans, animals, plants and minerals) is really with no change. We must help the nature to get over these people and organisations or they spoil everything. Please realise this allways.

- For us health really everything is very much positive made and added for the creations for the nature of the earth and the universe when they are living on the earth surrounded in the open country with all creations they help each other.

- These big animals us security- and health-police, much better as the humans with are looking for extras and therefore they make extra-conditions. This is against the right people and the state. But good for them.

- The infect-rate and the rate of death by very heavy animals and real ray, not german gen-ray, green harvested grain mostly a sort of wheat what the Germans sell as rye. The Germans can not eat or live with real rye, they spoil it greatly, because it is everyone shown that other rye is in Germany eaten, When you bring that great difference to people of the state of Germany they are coming you, but on the other side they try to kill you.

- all special things have I written to the special things. - for example all what is interesting by the corona-virus, stands by the side corona-virus.

Maybe that I have forgotten something, what these animals although can do with us creator, It is true they are dangerous for us. There Help for us humans, all other creations, the earth and the universe nature is very huge (highly more than great, you can not think about it)

I really do not know how long we can live now, it can last a few months more when us nature and us creator gives grace it can last long, But I really do not know, what is now going on with the earth and the universe, only us creator knows these.

I for my own, I do as much as I can for the humans which are going without compromise for the nature with the nature. Therefore because you need the right

information is it necessary to work for you, but I need although going out in the nature, for my body, soul and brain.

The days of remembrance and rest what the Jewish people have with a clearly meaning of us all. For example Jonki poor with the following of the Jewish New Year, the Passa the leaving and going away from us normal way of life the celebration of lights nearly at the changing of the sunrise, when the days get longer and so on.

You can make a special day for me it is not my real birthday on the 5-7-1964 in Munich, but the 27 of June the day where the animal is weak up who is sleeping nearly the death, the most time of the year, in Germany „Siebenschläfer“
Why that?

It took nearly my whole life to get rid of the medicine which was poison for me and many other people, but I have said that in the first month they started to treat me with that poison. But an easy handicapped people are doctors who have studied, which are nearly get help from all people, with all sorts of power. As a lonely human you have no change, although when you are in the normal right.

At the moment living is not easy, I say the truth without coming in front of them, the most people try to kill me or give me in the hands from the wrong doctors, because they are knowing much too less, what is needed for the health of all sorts of people in the countries, where I have seen it correctly in Switzerland, Liechtenstein in Netherlands and Germany I can clearly say, because of the reason these doctors have much too less knowledge about the nature - they are murders. Mostly these is one sort of doctors, but the people, the police allows themselves to check the health, and they have the power over you.

This document is not finished - - I must go, because my brain needs a rest.
